I N S T A L L A T I O N G U I D E

INSTALLATION KIT

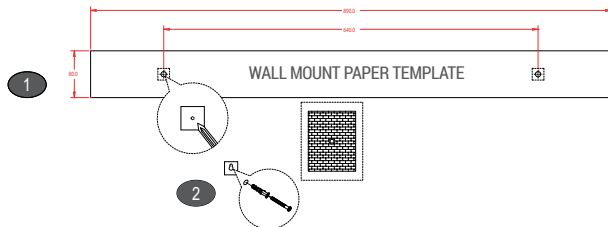

- 1 2N WALLMOUNT BRACKETS (2.2cm) 
- 2 2N PLASTIC FASTENER (White) 
- 3 2N SELF THREAD SCREW (3cm) 
- 4 8N SELF THREAD SCREW (1cm) 
- 5 1N WALL MOUNT PAPER TEMPLATE 

WALLMOUNT CARVAAN MUSICBAR

Step 1: Fix the screws

1. Stick the wall mount guide paper on the wall with a tape
2. There are 2 holes on the paper. Make a mark on the wall through the holes.
3. Remove the wall mount paper guide
4. Drill the marked locations. Put the fasteners (2N) & screws (2N) in the drilled holes.

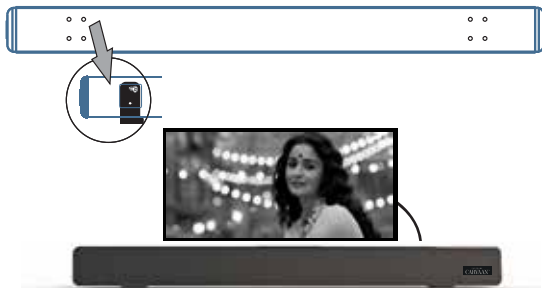

Note: ensure that the paper template is aligned correctly in order to avoid misalignment of the screws

Step 2: Connect the brackets to the Carvaan Musicbar

The installation kit comes with 2 brackets - one for each end of the Carvaan Musicbar.

There are four holes (for each bracket) on the back panel of the device. Place the wall brackets on the back panel and ensure the bracket & holes are aligned. Once aligned, insert screws (1cm) into the 4 holes on the bracket. Your Carvaan Musicbar is now ready to be wall mounted.

Step 3: Hook the Caravan Musicbar on the wall

Hook the brackets on the screws drilled on your wall. Connect any USB / cable (HDMI / Aux / Co-axial) before hanging the Carvaan Musicbar.

ATTACH ANTENNA WIRE HOLDER TO THE BACK PANEL OF YOUR CARVAAN MUSICBAR

Step 1: Fix the Antenna Holder

Installation kit comes with 2 plastic antenna holders.

There are double sided tapes attached to the back panel of the Carvaan Musicbar.

Remove the plastic cover from the tape and attach the holder upward on the double sided tape.

Step 2: Hang the Antenna wire

Hang the antenna wire on the holders as shown in the image below. You can use the antenna wire for better reception of signal in FM mode.
